## AUTOMOTIVE ENGINEERING

ADACCESS is a French and innovative start-up expert in data acquisition of physical measures, and expert in Demo Car & Lab Car production.

Partner of your performance, ADACCESS offers a range of key services to answer to your specific needs :

- project management **from A to Z**,
- **synergy of skills from our experts** : physics, electronics, mechanics & IT,
- **personalized** support,
- complete **independence** thanks to our technical means : design office, electronics lab, vehicle & prototyping workshops...

*Our mission : to be the key partner of your productivity*

**1** HUMAN-SIZED TEAM

FOR A PERSONALIZED SERVICE

- ★ **API by TOTAL**  
Financial support
- ★ **Initiative PME by ADEME**  
Financial support and reward
- ★ **ADI by BPI FRANCE**  
Financial support

ADACCESS IS REGISTERED AS CREDIT IMPOT RECHERCHE, A FRENCH TAX-DEDUCTIBLE CONTRIBUTION FOR OUR CLIENTS

## SOLID EXPERTISE

### Global service & all-inclusive projects

ADACCESS works in the whole **V-model of R&D automotive engineering**. With our all-inclusive project services, we offer a **complete management** of your project, from conception phase to finale validation.

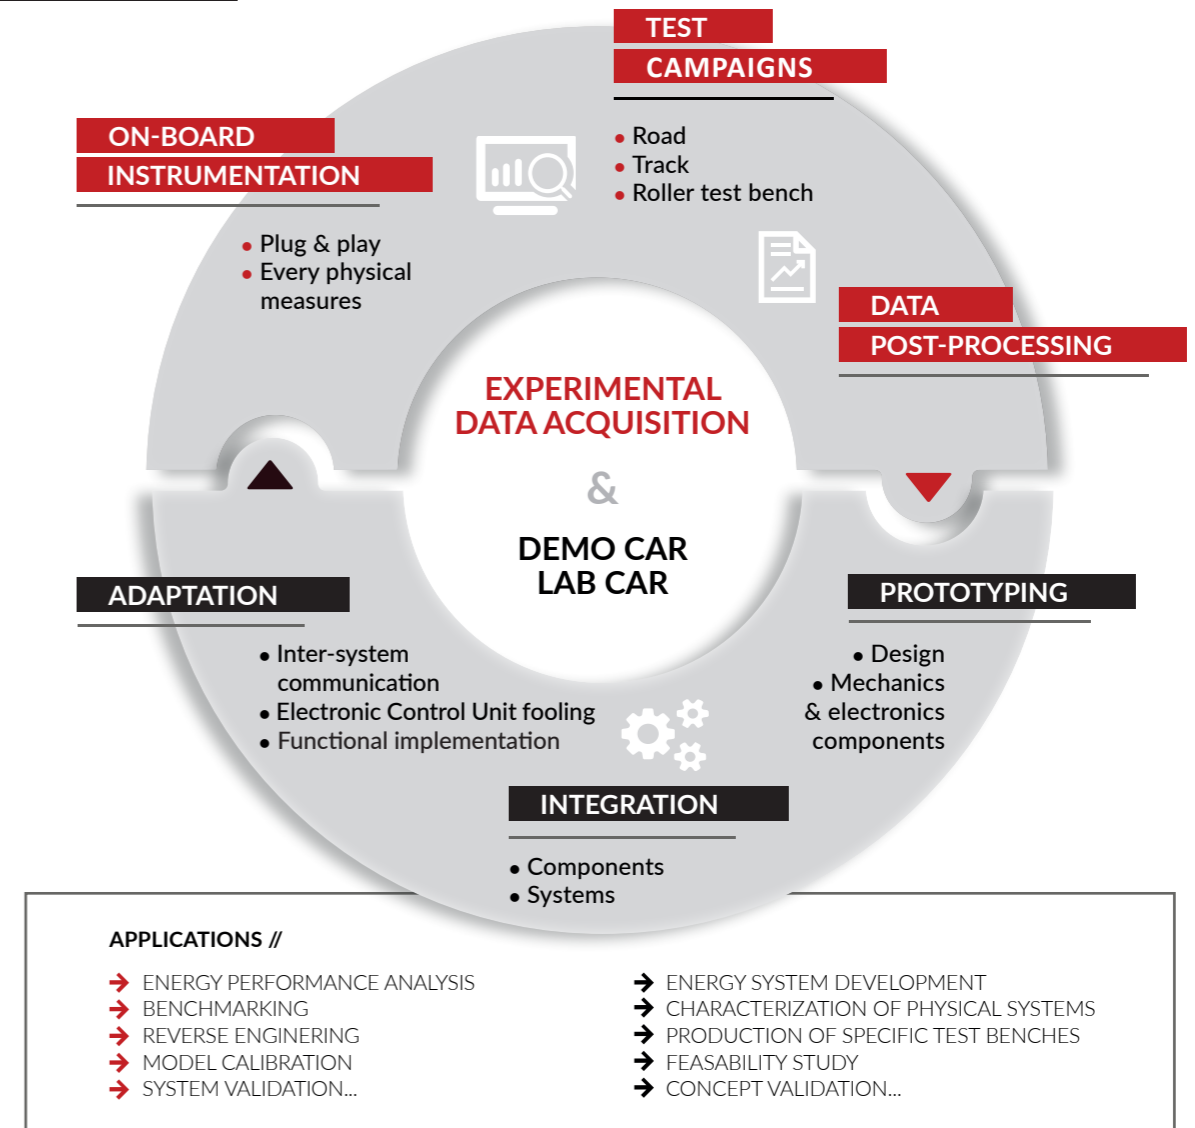

### Single contact & collaborative approach

ADACCESS offers a **personalized support** in every project : one contact is dedicated to your project management. At the same time, ADACCESS's team works in **close collaboration** with all our clients.

### Secured commitment & satisfaction guaranteed

As partner of your **success**, ADACCESS is committed in respect of **costs, deadlines** and **quality** of the services. ADACCESS is following a constant **improvement process** to guarantee a high level of satisfaction from our clients.

## INNOVATIVE APPROACH

## UPCOMING

### eVA, NEW PLATFORM OF EXPERIMENTAL DATA & PARTICIPATIVE PROJECTS

Producer of engineering studies and experimental data, ADACCESS will launch very soon **eVA**, a new platform of experimental data & participative projects.

This online and innovative service will be divided in 2 parts :

- 1. Data Store** : studies and data set,
- 2. Project Factory** : "engineering factory" of data acquisition projects, open to participation of our clients.
